

## **Security Specialist Student Trainee Position**

Security Management and Safeguards Office (C)  
Center Operations Directorate (CX)  
NASA Glenn Research Center, Cleveland, OH

### **Job Description:**

The student will perform security duties in the Security Management and Safeguards Office. The student will be involved in a broad range of technical security services for the protection of personnel, facilities, and sensitive information from acts of crime, terrorism, and technical espionage. Assignments are accomplished by:

- Conducting technical security assessments and identifying security upgrades.
- Identifying security risks, analyzing those risks, and specifying system requirements and procedures.
- Planning, conducting certification tests, and maintaining security needs.
- Identifying, designing, and installing equipment or products for technical security and information technology.

The student will work closely with senior personnel. Complexity of tasks will increase as student gains experience.

### **Length of Position:**

Alternating quarters/semesters until graduation.
